## Coding Optional Design

Low-code development tools optimize productivity for citizen developers while allowing developers to hand-code at will

## Advanced Offline Features

Patented capabilities for building offline apps that work flawlessly without a connection, including accessing on-device data

## Full Deployment Capabilities

All the tools needed to build and publish apps to the cloud, to any ISP, or to your own infrastructure

## Integrate with Any System

Powerful API and tools for integrating with web services, data sources, and workflows

## Standards Based

Enables developers to learn and become proficient faster and leverage external libraries

## Simple Licensing

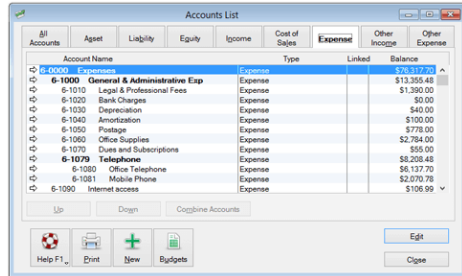

No limits on the number of users, number of apps, or complexity of your apps

# Alpha Anywhere's low code environment can build apps for many targets

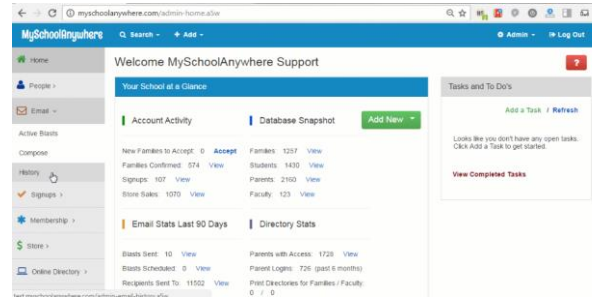

## Multiple possible options

### Desktop (Windows)

### Desktop Web

### Mobile web

### Android / iOS

Alpha's approach to low-code is through a proven "coding optional model"

In Alpha Anywhere most of the development is done using no code wizards/genies/configuration dialogs

These tools are provided by a low-code software IDE, which then implements the visual configuration using pre-built code, while retaining the capability for adding hand-written code where needed.

# Alpha's Development Approach ensures high productivity along with full power/control

- “Full stack” application development: a single IDE for implementing database connections, server-side functions, client-side functions, UI design, app deployment and version control
- Low-code IDE: implement standard application functions (querying a database and displaying a sortable/searchable list of the results, capturing a photo, getting geolocation data, and dozens more) with on-screen genies, “coding-optional”
- Backend abstraction: interaction with SQL backends is built generically, irrespective of the technology/vendor, so solutions are easily migratable
- Web-based development methods: for any manual coding/customization required, development for both web and mobile apps is done using standard HTML/CSS/JS technologies

Alpha is the only low-code platform with a patented multi-tiered solution for building offline mobile apps

## Alpha offers the most complete and powerful set of application development tools for building robust offline-capable mobile apps

### Full Functionality Without Signal

This one may seem obvious, but...

All of the features and functions a worker needs to do their job must be available to them in the field, even if they lose signal...  
...or never had signal to begin with.

When signal drops, an application must perform as if nothing happened.

### Intelligent Conflict Resolution

What happens if two workers change the same data at the same time?

Conflicts can happen when multiple crews work on the same project. With **Intelligent Conflict Resolution**, you have some flexibility in how to handle these situations. You can decide based on the user's authority (such as a line worker or foreman) or who submitted the data first. Or, you can alert the user to the conflict and ask how they would like to handle it.

### Smart Signal Detection

As you know, Internet connections can vary significantly. Just because a phone or tablet has an Internet connection doesn't mean that it's a fast connection - or an inexpensive one.

Imagine a worker on a construction site has filled in a checklist and taken a number of high resolution photos of the state of the project. A smart application can sense if it is a cell signal versus Wifi, and behave accordingly.

For example, the app can upload just the checklist items that are available immediately to the crew, while waiting to upload the photos until it's connected to Wifi. That way the pictures upload faster, and the user doesn't burn through their cellular data quota.

### Access to Onboard Assets

Phones and tablets can store lots of helpful assets that are available to workers even when offline.

Some of the many examples include;

- databases
- blueprints
- CAD drawings
- service manuals
- cross-reference charts
- and even how-to videos.

*Alpha understands these challenges and as a result has put together the most comprehensive portfolio of patented capabilities designed to make building mobile apps that deal with the offline challenge as easy and hassle free as possible!*

[More info](#)

Alpha Anywhere  
was designed to  
dramatically boost  
the output of  
developers who  
need to build robust  
web and mobile  
apps

**Cross-platform mobile development** lets me build custom business apps for Android and iOS really fast

**Low code mobile app development** helps me develop and deploy robust business solutions quickly

I can create **offline mobile apps** that work anyplace, plus access databases, docs, and media without a connection

**Mobile forms** let us take business processes digital, and **collect data** easily on field apps

We can **go paperless** and make our workplace safer and more efficient

Using Alpha Anywhere for **digital transformation** allows us to streamline all types of business activity

Alpha offers what companies tell us they want – CHOICE  
self hosting, private cloud and public cloud deployment

## Alpha Cloud

leverages all the power of Amazon AWS  
without developers having to become dev/ops experts.

Instead, developers can focus on developing great apps

- Direct publishing to the Cloud from Alpha
- Create multiple sites and test environments
- Publish to any Alpha Anywhere version
- Automatic scaling to handle increased demand
- Integrated rollback and deployment scheduling/Failover support
- Container Support

- Domain name support
- Multi-region support
- TLS/SSL support
- Tenancy control
- Fine-grained control of resource management
- Administrative controls for Dev Teams

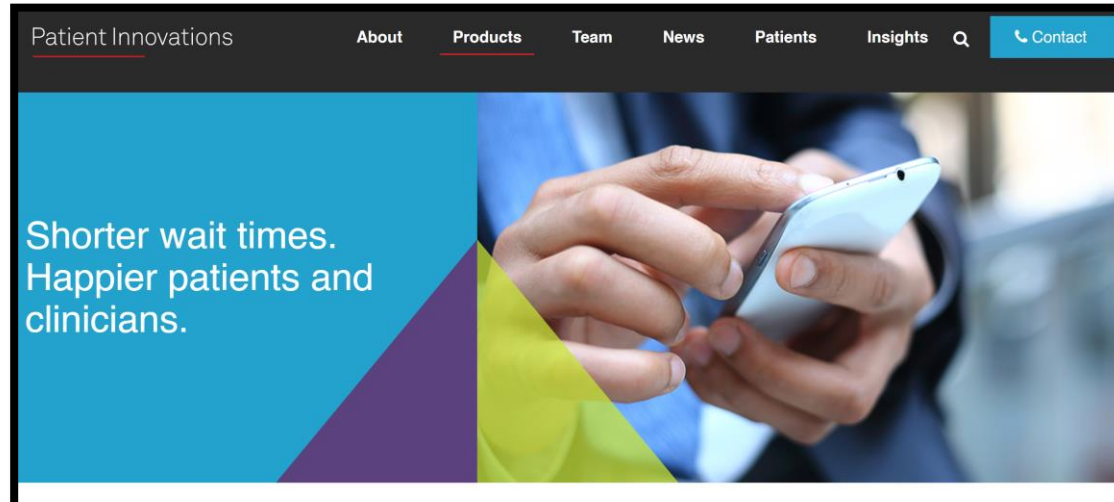

## **Examples of Apps built in Alpha Anywhere**

# Patient Innovation/On Time Care Better Patient Experience, Efficient Scheduling, Less Waiting

<https://patientinnovations.com/>

## Videos

The collage displays various features of the OnTimeCare software:

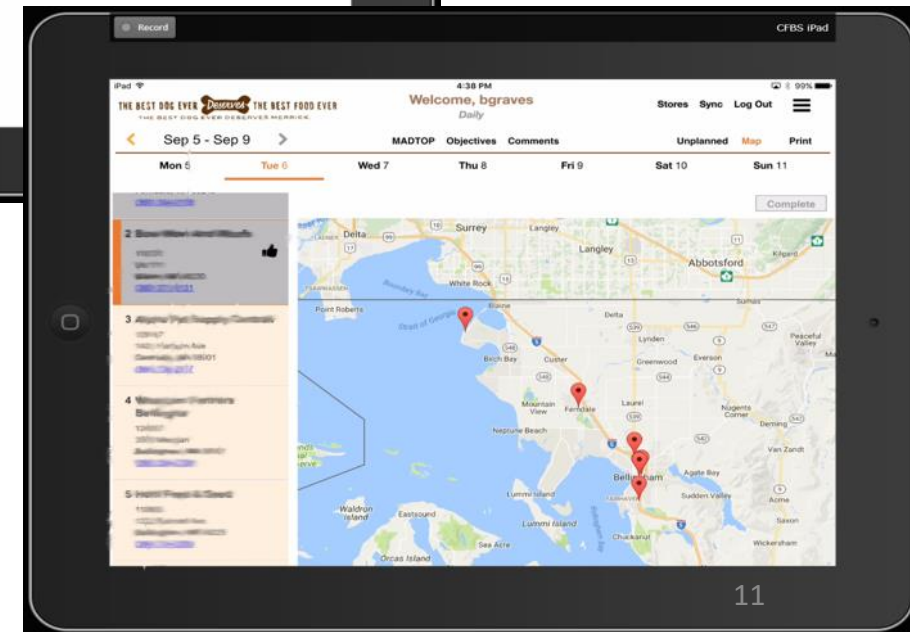

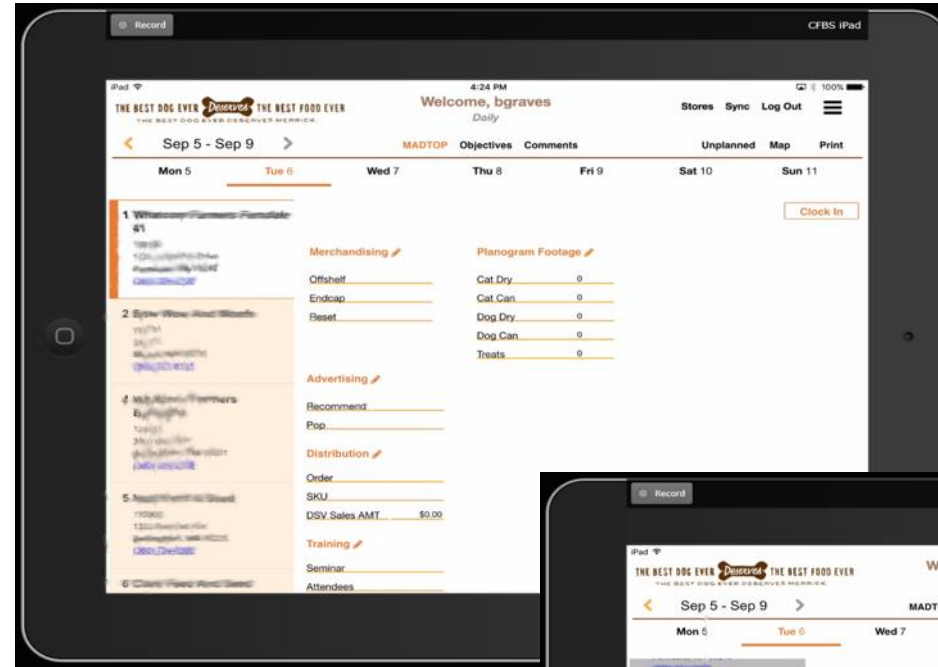

- Scheduling Calendar:** Shows appointment slots for June 8-14, 2020, and June 1-7, 2020. It includes filters for "Select number of weeks out" (+1 to +5) and lists physicians like Howell, Tomlinson, and Cayford with their confirmed and total appointment counts.
- SmartBalance (TM) Alert:** A notification box stating "Alert patients of availability ahead of their booked appointments" with options for "Same Day & Time of Week", "Same Time of Week", and "Same Day of Week".
- Appointment List:** A list of confirmed appointments such as "04:45 PM - Ivan Parks" and "05:00 PM - Jaksyn Brock".
- Check-In Screen:** A patient check-in interface for Phinehas Frazier, showing medical history (Walker, Wheelchair, etc.) and a "Check In" button.
- Provider Selection:** A pop-up window titled "ADAM - Select a provider" showing options for Dr. Howell (On Time), Dr. Tomlinson (30 minutes behind), and Dr. Cayford (40 minutes behind).

# Covid 19 Vaccination Suite Built in 2 weeks in Alpha Anywhere

There are daunting logistics issues around getting people vaccinated.

A key logistics challenge is setting up an efficient online method for booking appointments for people to get the two injections that are spaced weeks apart. This is where "**OnTime Care Vibe**", (which was built in Alpha Anywhere and deployed on Alpha Cloud), comes in.

It offers a very powerful and elegant solution including appointment setting online in real-time from any web page, Social Media, search and business listings, map listings and more. "**OnTime Care Vibe**" includes SmartComm® - a robust communications suite including responsive texts, broadcast texts, secure messaging, automated calls, email and tele-medicine capabilities.

All messages and responses are viewable in the patient record. "**OnTime Care Vibe**" includes flexible reminders, intelligent load balancing of the medical resources, online intake and workup.

"**OnTime Care Vibe**" will also produce a *Certificate of Vaccination* for each patient completing the two-shot regimen. The system will transfer data to a national registry and allow anyone to validate the authenticity of any printed certificate by querying the system to prevent certificate forgeries.

All-told, "**OnTime Care Vibe**" is designed to provide that best possible patient experience and an orderly, reliable and cost effective system for getting people vaccinated.

WITH ONTIMECARE VIBE: YOU'LL BE READY FOR ANTICIPATED OVERWHELMING DEMAND FOR THE NEW COVID VACCINES

Instant Online Booking For Covid19 Vaccinations

SMARTPHONE BOOKING FOR EVERYONE

Patient Innovations

OnTimeCare Vibe

KEEP CALL CENTER VOLUME DOWN

**Overwhelming Demand Coming**  
Will you be ready for the imminent overwhelming demand for Covid19 vaccinations?

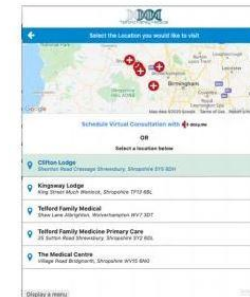

Staffing up your call center just won't cut it. Patients want 24/7/365 booking access without hold times.

**Pandemonium or Precision?**

Avoid pandemonium with the precision of OnTimeCare Vibe.

Vibe: precise online booking from:

- Any page on your website
- Paid search listings
- Online business listings
- Map listings
- Social Media pages

You'll take pressure off your medical team and call center staff.

**Book and Communicate**

Patients can book, cancel or reschedule from their smartphones.

SmartComm® communicates with patients and keeps them and health proxies engaged with responsive text messages, emails, automated phone calls, group texts, broadcast texts and Telemedicine.

Available in multiple languages  
Anybody can book and communicate with Vibe.

**Communicator Saves More Time**  
How often do you call patients with simple test results only to find they don't want to let you off the phone for 15 minutes? Send quick texts with Communicator and save time. And all texts back and forth are stored in patient history.

Call Today for a Demo  
Contact Ken Greenberg, President  
P: 212.380.8386 x 705;  
E: ken@patientinnovations.com

**Late Alerts**

Automatically notify patients of long waits so they can arrive closer to the time they'll actually be seen.

**SmartBalance™ – Auto Load Balancing**

OnTimeCare alerts waiting patients of delays and suggests switching to an earlier available practitioner in the group based on coverage rules you set.

When booking online, VIBE displays earliest availability across locations.

**SmartStandby: No More Overbooking**

SmartStandby keeps your schedule full automatically – filling cancellations and anticipating and pre-filling no-shows.

**Improve Survey Scores**

With easier booking and access plus shorter wait times and greater communication you'll go from patient satisfaction to delight.

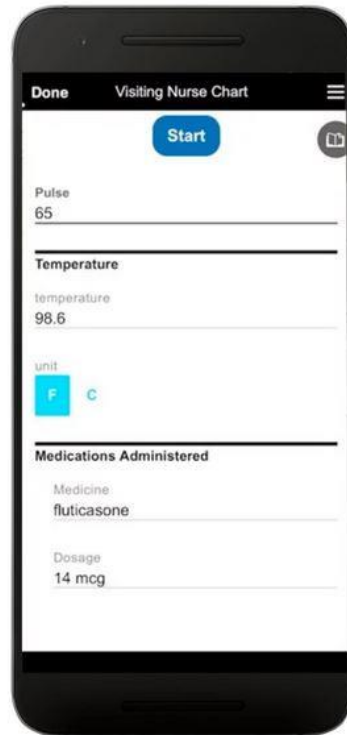

**SmartChat – AI Chat**

Every practice can now afford AI Chat services. Cut down on phone calls as patients can get answers to most of their questions with AI.
